

**St. Clair County
Health Department**

**Reportable Disease Update
July 2016**

Date Issued: July 15, 2016

The Reportable Disease Update has been developed to communicate infectious disease surveillance information to community healthcare professionals. This update will be distributed quarterly to identify and communicate issues, trends in the community, and emerging communicable diseases that can impact our community.

Information Items:

- Warmer weather promotes more outdoor activity and interactions between humans and animals. Updated decision making flowcharts regarding rabies can be found at <http://www.michigan.gov/emergingdiseases/0,1607,7-186-25807---,00.html>
- Zika Virus Disease remains a dynamic health concern. Guidelines for travel, preconception education, pregnancy, sexual transmission, care of infants and children with possible Zika virus disease and symptomatic individuals have been updated as new information is gathered. Links to updated guidance can be found on St. Clair County's (SCCHD) website at www.scchealth.co

Please see the table on the next page for counts of reportable diseases as of June 2016.
