<td>Recovery (Post-Surge)</td>
</tr>
</tbody>
</table>

In communities like ours with a low COVID-19 Community Level, the CDC recommends:

- Stay [up to date](#) with COVID-19 vaccines and boosters
- Maintain improved ventilation throughout indoor spaces when possible
- Follow CDC recommendations for isolation and quarantine, including [getting tested](#) if you are exposed to COVID-19 or have symptoms of COVID-19
- If you are immunocompromised or [high risk](#) for severe disease
  - Have a plan for rapid testing if needed (e.g. having home tests or access to testing)
  - Talk to your healthcare provider about whether you are a candidate for treatments like oral antivirals, PrEP, and monoclonal antibodies

At all Community Levels, people can wear a mask based on personal preference, informed by personal level of risk. People with symptoms, a positive test, or exposure to someone with COVID-19 should wear a mask.

As of 6/24/2022
Ongoing response to COVID-19 cycle

Response (Surge)
A surge means rapid response by local and state public health.
- Increased supplies for testing, masking and medications.
- Increased masking, testing and social distancing efforts.

Readiness (Pre-Surge)
A surge is expected due to a new variant, local outbreak, seasonal changes.
- Expect increased illness severity and overwhelmed hospital capacity.
- Educate public regarding new risks.
- Ensure enough supplies of tests, masks and medications.

Recovery (Post-Surge)
Expect to remain in this phase for longer periods as COVID-19 evolves.
- Monitor conditions that may lead to surges, such as a new variant.
- Encourage vaccines to decrease COVID-19 risks.
- Strengthen community support with local stakeholders.
- Empower community members to make best choices for individual situations.

Data is this report is provisional.
# Make a COVID-19 Plan

**Make a plan for vaccination or learn if you are eligible for boosters.**
- Ages 5 and older can get vaccinated.
- Ages 12 and older can get the booster.
- Ages 50 and older, or 12 and older and moderately to severely immunocompromised, can schedule a second booster.
Learn more about vaccines and whether you’re up to date at [Michigan.gov/COVIDVaccine](https://Michigan.gov/COVIDVaccine).

**Keep a supply of well-fitting masks.**
- Masks are helpful tools to reduce COVID-19 transmission, especially if:
  - You are unwell or test positive for COVID-19.
  - You have been exposed to someone with COVID-19.
  - You are concerned about the risk of transmission in a particular setting. Respect that others may have a risk different than yours.
Learn more about masking at [Michigan.gov/MaskUp](https://Michigan.gov/MaskUp).

**Keep a supply of over-the-counter COVID-19 tests.**
- Tests are useful for early detection of COVID-19, especially if:
  - You have symptoms of or have been exposed to COVID-19.
  - You are traveling or will be attending a large or unmasked gathering. Test before and after attending large events.
- Over-the-counter tests are available at libraries and schools through MiBackpack, also through federal distribution programs.
Learn more about COVID-19 testing at [Michigan.gov/COVIDTest](https://Michigan.gov/COVIDTest).

**Learn if you are eligible for COVID-19 therapeutics.**
- Talk to a primary care provider about whether you are eligible for preventative antibodies or for COVID-19 antiviral treatment if you become infected.
