

# St. Clair County Health Department Possible COVID-19 Case in Students

Student has any of the following symptoms (new/different/worse than baseline for any chronic illness):

- Temperature 100.4 degrees Fahrenheit or higher
- Sore throat
- New uncontrolled cough that causes difficulty breathing
- Diarrhea, vomiting, or abdominal pain
- New onset of severe headache

**\*Exempt from quarantine:**

**Scenario 1:** Individuals identified as close contacts who have recently recovered from COVID-19 will not be required to quarantine if:  
They do not currently have symptoms AND;  
Were diagnosed with COVID-19 by either (1) a positive RT-PCR or antigen test for SARS-CoV2 within the last 90 days, or  
(2) a healthcare provider based on symptoms, and 90 days or less have passed since symptoms began.

\* There should be a record of the case having been reported to public health in order to exempt a close contact from quarantine.

**Scenario 2:** Vaccinated persons with an exposure to someone with suspected or confirmed COVID-19 are not required to quarantine, if they meet ALL of the criteria:  
They are fully vaccinated; at least 14 days since receiving the final dose in the vaccine series (2 doses of Moderna; 2 doses of Pfizer; or 1 dose of Janssen/Johnson & Johnson) AND  
They have not developed any symptoms since their exposure to someone with COVID-19.

\*If exposure is in classroom where masks and other mitigations strategies are being followed then 3 feet and 15 minutes is used to establish exposure.

Anywhere else it is still 6 feet 15min.
